

OVER 50 YEARS EXPERIENCE

HAS EARNED US MANY FRIENDS
AND SATISFIED CUSTOMERS —
AND THE LIST IS GROWING!

In addition to the Eastern United States, our on-site location repairs have included pumping equipment on the oil pipeline in Saudi Arabia; engine repairs in Spain and Alaska; repairing a container ship generator while en route to Guam and Taiwan; freighters en route to Newfoundland and repairs to the "Banana Boats" in and around the Gulf of Mexico.

In short, we have no territorial boundaries, and we are as close to you as your telephone.

— PERMANENT REPAIRS ON QUOTED BASIS —

— LASTING DEPENDABILITY —

BULLARD TURRET CROSS SLIDE

Over 30 pieces broken out of this cross slide left us no alternative but to replace both slide keys and all the tee slot support areas.

NO HEAT USED!

REPAIR IS STRESS FREE AND
PRACTICALLY INVISIBLE

IN OUR SHOP — OR YOURS

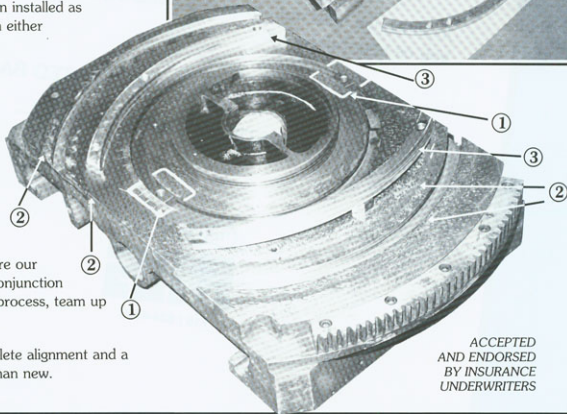

Four new sections have been installed as shown here, marked ②, on either side of outside tee slots.

Two new curved keys, marked ③, were made up.

Small segments of inside tee slots were replaced (including degree markings) and are marked ①.

Now completed, this is where our machine shop facilities, in conjunction with our mechanical repair process, team up to effect the complete job.

The repair resulted in complete alignment and a unit as strong or stronger than new.
